

# Accountant

Finance, invoice, client, payment, activity, and reporting access.

**Finance Access**

Accountants can review the financial side of the workspace without managing queue operations or user settings. This role is for bookkeeping, invoice review, payment review, client balance review, and reports.

| What This Role Can Access                                                                                                   | Important Guardrails                                                                                                                                                  |
|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>• Dashboard, Estimates, Invoices, Payments, Clients, Reports, and Activity.</li></ul> | <ul style="list-style-type: none"><li>• Accountants should not need property manager portal access.</li><li>• Do not change user settings unless necessary.</li></ul> |

## Open Money

|                                                               |                                                                                                     |                                                          |
|---------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| 1. Use the dashboard and review unpaid balances and invoices. | 2. Use Invoices for current invoice status, draft balances, aging, and documents ready for payment. | 3. Use Payments when one check covers multiple invoices. |
|---------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|----------------------------------------------------------|

## Process Payment

|                                                            |                                                |                                                                                      |
|------------------------------------------------------------|------------------------------------------------|--------------------------------------------------------------------------------------|
| 1. Review payments and search for the customer or invoice. | 2. Select the invoices paid by the same check. | 3. Confirm the total, enter the payment amount, and mark the selected invoices paid. |
|------------------------------------------------------------|------------------------------------------------|--------------------------------------------------------------------------------------|

## Reports

|                                                                                     |                                                                      |                                                                                                        |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| 1. Review reports for revenue, invoice aging, queue metrics, and readiness metrics. | 2. Use Activity to confirm who created or changed important records. | 3. If a number looks wrong, check the invoice, estimate, and payment records before creating anything. |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|

**Workspace reminder:** Trimax supports more than one business. Always confirm you are working in the correct workspace before creating queue items, estimates, invoices, services, payments, or reports.
