

Admin

Trusted office operations access without needing to be the business owner.

Operations Access

Admins can operate almost the entire workspace. This role is for a trusted helper who can manage day-to-day queue, client, estimate, invoice, payment, service, report, activity, and settings work.

What This Role Can Access • Dashboard, Queue, Schedule, Estimates, Invoices, Payments, Clients, Services, Reports, Activity, and Settings.	Important Guardrails • Do not delete old records unless the owner asks. • Keep R&I photos and notes in workspace.
--	---

Operations		
1. Review dashboard and review recent queue items, invoices, and outstanding balances.	2. Move into Queue for apartment turns or into Clients, Estimates, and Invoices for normal customer work.	3. Keep notes clear so the owner can understand what changed later.

Take		
1. Select queue item for one unit, or paste item when several apartments are involved.	2. Fill in move out date, ready date, scheduled date, paint type, flooring, priority, remediation, and renovation fields.	3. Review saved renovation history before starting it.

and Payments		
1. Create invoices directly, or convert from estimates or work started from an estimate.	2. Use Payments when one check covers several invoices.	3. Print or export documents only after reviewing customer, service address, totals, taxes, and items.

Workspace reminder: Trimax supports more than one business. Always confirm you are working in the correct workspace before creating queue items, estimates, invoices, services, payments, or reports.
