

Admin

Trusted office operations access without needing to be the business owner.

Operations Access

Admins can operate almost the entire workspace. This role is for a trusted helper who can manage day-to-day queue, client, estimate, invoice, payment, service, report, activity, and settings work.

What This Role Can Access

- Dashboard, Queue, Schedule, Estimates, Invoices, Payments, Clients, Services, Reports, Activity, and Settings.
- Create and update queue items, estimates, invoices, clients, and services.
- Record payments and use batch payment tools.
- Review operational reports and activity history.

Important Guardrails

- Do not delete old records unless the owner asks.
- Keep R&L; and Just Kleen data in their correct workspaces.
- Use clear notes for scheduling changes, payment actions, and customer requests.
- Ask the owner before changing global settings or user access.

Daily Operations

1. Open the dashboard and review recent queue items, recent invoices, and outstanding balances.
2. Move into Queue for apartment turns or into Clients, Estimates, and Invoices for normal customer work.
3. Keep notes clear so the owner can understand what changed later.

Queue Intake

1. Create one queue item for one unit, or paste multiple units when several apartments are submitted at once.
2. Fill in move out date, ready date, scheduled date, paint type, flooring, priority, remediation, and renovation fields.
3. Review saved renovation history before changing it.

Invoices and Payments

1. Create invoices directly, or convert from estimates when the work started from an estimate.
2. Use Payments when one check covers several invoices.
3. Print or export documents only after reviewing the customer, service address, totals, taxes, and line items.

Workspace reminder: Trimax supports more than one business. Always confirm you are working in the correct workspace before creating queue items, estimates, invoices, services, payments, or reports.
