

Member

Minimal access while a user role is still being decided.

Limited Access

Members have very limited access. This role is useful as a temporary starting point when someone has been invited but should not yet access operational or financial tools.

What This Role Can Access

- Dashboard only.
- No queue actions, invoice actions, payment actions, reports, services, clients, activity, or settings.
- No property portal editing unless the owner changes the role.

Important Guardrails

- Member is not meant for active daily operations.
- Do not share your login with another person.
- If you see the wrong workspace, stop and contact the owner.

First Sign-In

1. Sign in using the invite email.
2. Confirm the workspace name shown in the app.
3. Wait for the owner or admin to assign the correct role before doing work.

When More Access Is Needed

1. Ask the owner which work you need to do.
2. The owner can change your role in Settings.
3. After the role changes, sign out and sign back in if the navigation does not update right away.

Workspace reminder: Trimax supports more than one business. Always confirm you are working in the correct workspace before creating queue items, estimates, invoices, services, payments, or reports.
