

Owner

Full workspace control for Robbie, Lyubov, or a future business owner.

Full Access

Owners can see and manage every part of a business workspace. Use this role only for people who should have complete access to company operations, customer records, invoices, payments, reports, services, settings, and team access.

What This Role Can Access

- Dashboard, Queue, Schedule, Estimates, Invoices, Payments, Clients, Services, Reports, Activity, and Settings.
- Create, edit, print, export, and review documents.
- Invite workspace users and assign roles.
- Manage property team access for apartment portals.
- Review activity history and business-wide reports.

Important Guardrails

- Always confirm the workspace before entering sensitive data.
- Do not give Owner access unless the person should see all business information.
- Use the Activity Log as the memory trail for important work.
- Before deployment, test both R&L; Creations and Just Kleen.

Start the Day

1. Open the dashboard for the correct workspace, such as R&L; Creations or Just Kleen.
2. Review outstanding revenue, recent invoices, recent queue items, and any schedule attention cards.
3. Use the left navigation to move into the area that needs work.

Run R&L; Apartment Work

1. Use Queue for apartment turns, property manager requests, scheduling, remediation, and renovation tracking.
2. Create estimates from queue items when the job is ready to price.
3. Convert approved estimates into invoices when the work is ready to bill.
4. Use split invoice warnings only for apartment paint work that must stay under the approved target amount.

Run Just Kleen Work

1. Use Clients, Services, Estimates, and Invoices for cleaning customers.
2. Use the special spreadsheet-style print/export for 5 Star 5 or Bank of America style billing when needed.
3. Keep Just Kleen services and clients inside the Just Kleen workspace.

Control Access

1. Use Settings to add trusted staff, accountants, or property team users.
2. Give property managers access only to the property they should see.
3. Use Member as a temporary low-access role until the correct role is decided.

Workspace reminder: Trimax supports more than one business. Always confirm you are working in the correct workspace before creating queue items, estimates, invoices, services, payments, or reports.
